### Parliament passes IIIT bill, first on education by Modi government

HRD Minister Smriti Irani

Any decision on education policy will be in tune with constitution, Human Resources Development Minister Smriti Irani said Monday as Parliament passed a bill to bring four institutes of information technology under the ambit of a single authority.

The Indian Institutes of Information and Technology (IIIT) Bill, 2014, passed by Rajya Sabha on Monday, seeks to provide the four existing IIITs an independent statutory status and proposes to declare them as institutes of national importance to enable them to grant degrees to their students, an IANS report stated.

The bill, passed by Lok Sabha last week, is the first education bill passed by the Narendra Modi government. Moving the bill for passage, Irani assured the house that any decision on education policy by government will be in ambit of the constitution.

"Some members asked if the education policy decisions by government will be influenced by my own thought. I would like to assure members any decision will be within the ambit of constitution," she said.

Irani also called it a "golden moment" saying MPs from "left, right and center" came together for the education bill.

"I am feeling proud... the message is clear, there is no politics in education," she said.

The four institutes are IIIT-Allahabad, IIIT-Gwalior, IIIT Design and Manufacturing, Jabalpur and IIIT Design and Manufacturing, Kancheepuram.

### Indian Institutes of Information and Technology Bill gets Parliament nod

PTI | Dec 5, 2014, 10:02PM IST

**Topic:** The Bill | Smriti Irani | Jabalpur | Indian Institutes of Information and Technology | hr minister

**NEW DELHI:** A bill to bring four institutes of information technology under the ambit of a single authority and help students get degrees was today passed by Parliament.

The Indian Institutes of Information and Technology (IIIT) Bill, 2014, was passed by Rajya Sabha by a voice vote. It had received the Lok Sabha's nod on November 26.

HRD Minister Smriti Irani said students passing from these institutes will now get degrees and the government would make all efforts to attract the best of faculties.

She in particular referred to the agonies of the students of IIIT Kancheepuram who were awaiting their degrees since 2005 due to non-passage of legislations governing IIITs.

Alleviating apprehensions, she said the reservation policy will also be applicable to the IIITs in student admission and in recruitment of teaching and non-teaching staff.

Replying to members' comments on the autonomy of these institutes, Irani said, "The governance structure of these institutes will be like that of the IITs and NITs which were based on the Central Universities Act as passed by Parliament."

The passage of the bill gives the four institutes – IIIT-Allahabad, IIIT-Gwalior, IIIT Design and Manufacturing, Jabalpur and IIIT Design and Manufacturing Kancheepuram – the status of 'institutes of national importance.'

The Act will give these institutions independent status with uniform policy framework.

The declaration of the IIITs as institutions of national importance is being initiated with a view to providing manpower of global standards for the information technology industry.

Irani made it clear that these institutes will be "autonomous" and UGC role will be to only notify the nomenclature of the courses.

## RESEARCH FACILITY

IIITD&M houses high-tech equipments and several in-house developed test facilities to perform cutting edge research. Institute has separate high performance computation facility to perform theoretical/analytical research. IIITD&M Faculties do research in following fields.

### Research Fields:

- Manufacturing processes/CAD/CAM/ CAPP/ feature recognition/ CAE
- Alternate Substrates and high-k dielectrics for ULSI MOS
- Permanent magnet Brushless DC and AC Drives
- Bio-mimetic Design & Tissue Engineering
- Image Processing and Computer Vision
- MOS Device Modeling and Technology
- Medical Image based Reconstruction
- Solar Thermal Energy Applications
- CAD and Layered Manufacturing
- Renewable energy applications
- Computational Fluid Dynamics
- Algorithms and Data Structure
- Semiconductor Device Physics
- Power Electronics and Drives
- Fluid and Thermal Sciences
- Microwave passive devices
- Reconfigurable Computing
- Computational Geometry
- Software for VLSI design
- Software Defined Radio
- Enhanced heat transfer
- Network-on-chip (NoC)
- Microstrip antennas
- Theory of Computing
- Pattern Recognition
- Evolvable Hardware
- Engineering Design
- ASIC & RF MEMS
- Metamaterials
- Heat Transfer
- Fiber Optics
- Nanofluids
- Robotics
- MEMS

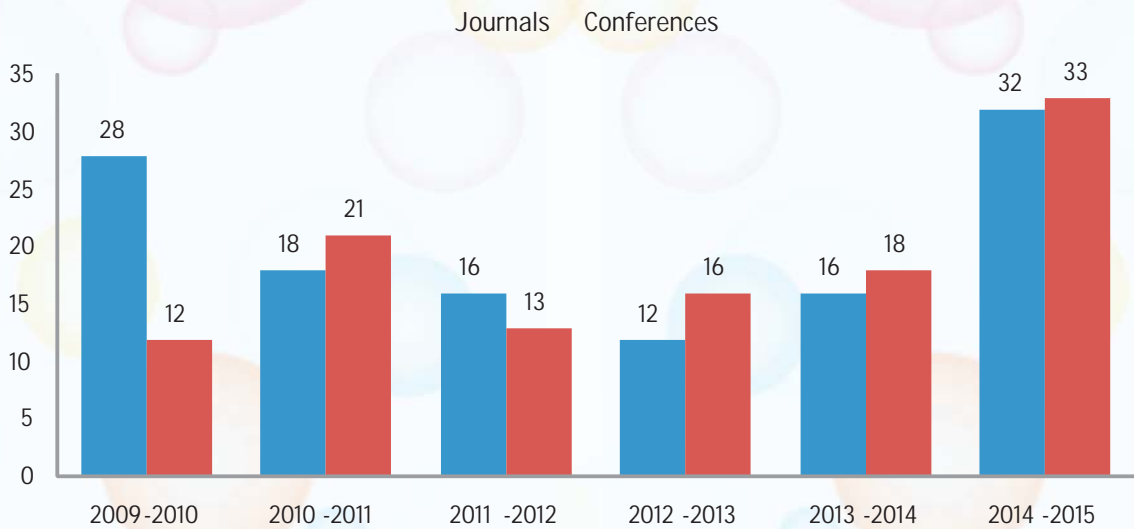

### Research Fields:

- Triba Characteristics of Biomaterials and Polymer Nano Composites
- Fatigue and Fracture mechanics of Advanced Engineering Materials
  - DSP Realization of Control Algorithms in Power Electronics
  - Nanocomposites- Product Design and Manufacturing
  - Engineering the Surfaces for Improved Performance
  - Relativistic Mean Field Theory in Nuclear Structure
    - Digital Communication over Fading Channels
    - Mechanical Design with Advanced Materials
      - Power Electronics, Drives and Control
      - Supersymmetric Quantum Mechanics
      - Smart Materials and Smart Structures
      - Data Structures in Computer Science
        - Graph theory and Combinatorics

*A teacher's purpose is not to create students in his own image, but to develop students who can create their own image!*

We cordially invite you for the  
**TEACHERS' DAY-2014**

**Welcome Address**  
Prof. R. Gnanamoorthy  
Director, IITD&M Kancheepuram

**Chief Guest**  
Prof. S. Karmalkar  
Professor  
Department of Electrical Engineering  
Indian Institute of Technology Madras

**Vote of Thanks**  
Dr. S. S. Karthikeyan  
Assistant Professor, IITD&M Kancheepuram

**Date** : 5<sup>th</sup> September 2014  
**Time** : 3.00 PM  
**Venue** : Room No. H05  
Academic Block  
IITD&M Kancheepuram

*Your cordial presence is solicited*

# International Students' Day

The event was held on 17.11.2014 at the Institute of Information Technology, Design and Manufacturing Knowledge Park, Chennai-600127. The theme of the day was "Shiksha Bharat, Saksham Bharat - Quality Education for All". The event was inaugurated by the Vice-Chancellor, IITDMK, who emphasized the importance of quality education for all and the role of technology in education. The day was filled with various activities, including a quiz, a group discussion, and a presentation. The event was a great success and was well-received by all the participants.
