QUESTION PAPER FOR THE POST OF JUNIOR ASSISTANT**

**Total Questions: 100**

**Maximum Time: 120 Minutes**

Read the following passage and answer **Questions 1 to 5**, based on the passage:

Climate change is emerging as one of the most significant challenges facing agriculture globally. Changes in temperature, precipitation patterns, and the frequency of extreme weather events are directly affecting crop productivity. In countries like India, where agriculture is heavily dependent on the monsoon, erratic rainfall patterns can lead to severe crop failures and food insecurity.

Small and marginal farmers are particularly vulnerable because they often lack access to modern technology, irrigation, and credit facilities. These farmers are usually dependent on single crops and cannot afford to invest in climate-resilient seeds or advanced irrigation techniques.

To combat these challenges, experts suggest adopting sustainable agricultural practices such as crop diversification, water conservation methods, and the use of technology-driven farming tools. Additionally, government policies should focus on educating farmers, improving infrastructure, and providing subsidies for adopting environment-friendly practices.

While the impact of climate change is undeniable, a coordinated effort involving policymakers, farmers, and researchers can mitigate its effects and help build a more resilient agricultural system.

1.	According to the passage, what is one of the major consequences of climate change on agriculture?			
A	Increased food imports	B	Decline in literacy rates in rural areas	
C	Decrease in crop productivity	D	Urban migration of farmers	
2.	Why are small and marginal farmers more vulnerable to climate change?			
A	They overproduce crops	B	They have excess access to credit	
C	They rely on outdated farming techniques and lack resources	D	They use climate-resilient seeds	
3.	What is one of the solutions mentioned in the passage to make agriculture more resilient?			
A	Banning the use of fertilizers	B	Encouraging large-scale monoculture	
C	Promoting crop diversification	D	Reducing farm sizes	
4.	How can the government help farmers tackle climate-related challenges, as per the passage?			
A	By providing education and infrastructure support	B	By promoting urban employment	
C	By cutting agricultural subsidies	D	By increasing taxes on fertilizers
